

DESIGN BASED LEARNING

<p style="text-align: center;">EMPATHIZE</p> <p>Understanding people, within the context of your design challenge.</p>	<ul style="list-style-type: none"> • Learn from experts • Uncover emotions • Seek stories • Understand big picture <ul style="list-style-type: none"> *Consider all living species 	
<p style="text-align: center;">DEFINE</p> <p>Outline the challenge you are taking on (POV)- craft a meaningful and actionable problem statement, narrow in.</p>	<ul style="list-style-type: none"> • Write out problem statement • Identify considerations, issues, all groups involved • Consider all information learned • Q= user + need + insight 	
<p style="text-align: center;">IDEATE</p> <p>Understanding the problem and coming up with general solution ideas. Open minded thinking with group.</p>	<ul style="list-style-type: none"> • Brainstorm with group- all ideas, ask for clarity • Build on others' ideas • No judgement • Mind map, sketch ideas • Step beyond obvious ideas 	
<p style="text-align: center;">PROTOTYPE</p> <p>Create an artifact intended to answer your question/problem. There will be many before one is "it".</p>	<ul style="list-style-type: none"> • Create quick objects and experiences • Role play to get ideas fine-tuned • Build to think and learn and generate more/new ideas • Build with the user in mind 	
<p style="text-align: center;">TEST</p> <p>Test to see if what you have created is going to work, embrace feedback, refine for user group.</p>	<ul style="list-style-type: none"> • Test with users to gather feedback and gather more information to make it better. • Embrace feedback • Gain deeper understanding of target goal and user need. 	
<p style="text-align: center;">ASSESS</p> <p>Consider what you created and feedback. How did you do? What could still be done?</p>	<ul style="list-style-type: none"> • Reflect on the design process. • Consider feedback and alter if needed. • Consider guidelines for evaluating project.
