

Here are some of the Windows 11 Changes:

📌 Start Menu is in the Center

Your Start button and apps may now be **centered** on the taskbar instead of the left.

👉 Want it back on the left like me?

Right-click the taskbar → click on Taskbar settings → then bar Behaviors → Taskbar alignment → Left

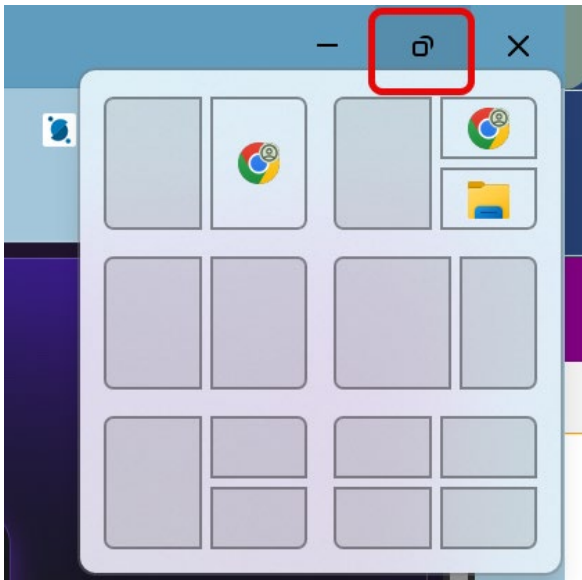

🗑️ Easier Window Snapping

Windows 11 makes it easier to organize your screen.

How to try it:

1. Hover over the **maximize button** on any window
2. Choose a layout (side-by-side, grid, etc.)
3. Click where you want the window to snap

Great for working with email + documents at the same time!

📁 File Explorer Has a New Look

Your files are all still there—just with updated visuals.

- New icons
 - Simplified top menu
 - Right-click menu is shorter
- 👉 Click **“Show more options”** for the full version
