

Professional Learning Community

We share *our* PLC Journeys...

To ensure every educator has access to best practices

that have proven to enhance student learning and engagement in SD71

.....

To help our professional peers

identify and effectively address similar issues in their classrooms without “reinventing the wheel”

.....

To learn from professional peers

who have different skills, strengths and strategies to offer our students

.....

To develop an inventory

of valuable resources, learning materials, and exemplars that we can access at any time

.....

To become a more resilient and responsive learning organization

that can better meet diverse learners’ needs

.....

To model for our learners

the processes and positive outcomes of working collaboratively toward a common vision or goal
