

Getting Started with the Spheros

To connect:

1. On the iPad (or other device) go to the **Lightening Lab** app. (Download it if needed.)
2. Press **Home** at the bottom
3. Press **Connect Robot** at the top

4. Press **SPRK+** and touch the Sphero to the device (it sometimes does a firmware update-be patient)
5. Now you should be able to use the Lightening Lab app to work with your Sphero.

Troubleshooting:

If the Sphero is blinking red, it needs to be charged.

If you are having trouble connecting:

-Put the Sphero back in the charger and press the reset button on the charger

-go to **Settings** on the Phone/tablet/iPad and press **Bluetooth** then turn Bluetooth on and off again by sliding the slider so no green is showing

-Check to make sure that the **Lightening Lab** app doesn't need updating on the iPad (go to the **App Store** and click on **Updates** at the bottom)

-Clear all the other Bluetooth devices from the list of possible Bluetooth items to connect to (Press the i to the right of the name)

Find Resources at Kara's Corner:

1. Go to learn71.ca
2. Click on **Kara's Corner** on the bottom right
3. Click on **Spheros** on the purple bar at the top

There are tonnes of ideas and programs that you can use in the Lightning Lab!
