

How to Reduce the Resolution of a Video Using iMovie on your iPad

Reducing the resolution of a video will enable you to fit it into ePortfolios without reducing the length of the video.

Steps		
1	Open iMovie	
2	Click on the + to start a new project	
3	Select Movie as your project	
4	Now you will see a list of video clips that are on your iPad. Click on the clip that you would like to reduce.	
5	Click on Create Movie at the bottom middle of the screen.	
6	When your movie opens you do not need to do anything to it. Click on Done in the top left corner.	
7	Now choose to share your video by clicking on the square with the up arrow at the bottom	
8	When the new screen opens, click on Options (small letters at the top).	
9	Choose 360p	

10	Press Back at the top	
11	Now click on Save Video and your movie will be saved in the Photo Gallery
