

Getting Started with the Spheros

To connect:

1. On the iPad (or other device) go to the **Sphero App** (Download it if needed.)
2. Press to **Connect Robot** at the top right

3. Press **Sphero PRK+** or **Sphero Bolt** and touch the Sphero to the device (it sometimes does a firmware update-be patient)
4. Choose one of the robots to connect.
5. Now you should be able to use the app to work with your Sphero.

Troubleshooting:

If the Sphero is blinking red, it needs to be charged.

If you are having trouble connecting:

-Put the Sphero back in the charger and press the reset button on the charger

-go to **Settings** on the Phone/tablet/iPad and press **Bluetooth** then turn Bluetooth on and off again by sliding the slider so no green is showing

-Check to make sure that the **Lightening Lab** app doesn't need updating on the iPad (go to the **App Store** and click on **Updates** at the bottom)

-Clear all the other Bluetooth devices from the list of possible Bluetooth items to connect to (Press the **i** to the right of the name)

Find Resources at Learn71.ca:

1. Go to **learn71.ca**
2. Click on **Curriculum Resources**
3. Click on **Elementary Curriculum Support**
4. Click on **ADST and Coding**
5. Click on **Spheros** on the purple bar at the top

There are tonnes of ideas and programs that you can use in the Sphero App!
