

OneDrive as a PDF Scanner

Use the camera application in the mobile OneDrive app to take a picture of a document, save it as a PDF and upload from OneDrive in Brightspace to hand in assignments.

Installing OneDrive

1	Open Apple Store or Google Play store. Search for “Microsoft OneDrive” . Tap “Install” .	
2	Open the app from the mobile device. Login using the @learn71.ca username and login.	

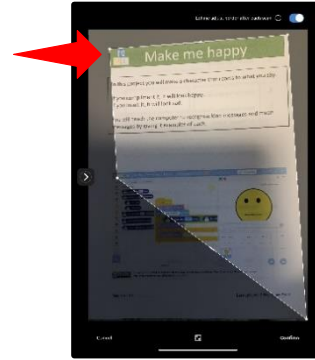

Using OneDrive as a Scanner

3	Tap on the “Camera icon” located on the bottom of the screen.	
4	Slide the file type options until the “Document” one is selected.	

5 Frame the document to be scanned. Tap the shutter button when ready.

6 Use the four handles located in each of the corners to adjust the shape of the document (crop or expand as needed).

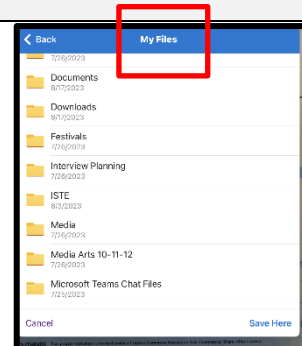

Tap the "+" button if scanning more sheets OR the "Done" button if complete.

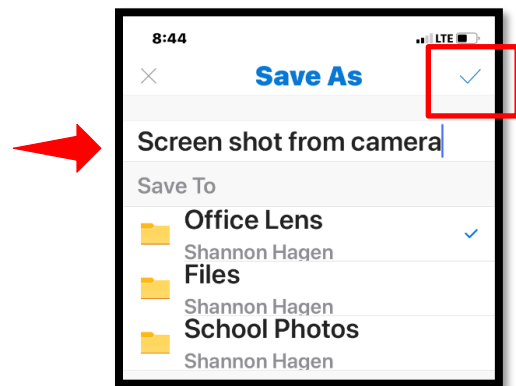

Saving the Document

1 Tap "My Files" to navigate to a specific folder located in your OneDrive.

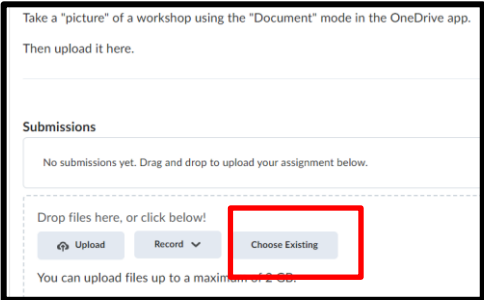

2 Rename the file the appropriate name.
Tap on the "checkmark" on the top right to save.

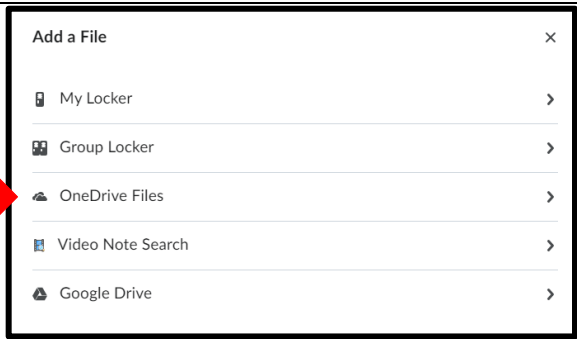

Handing In Assignment from Brightspace

1
Navigate to the course and assignment page. Click on **“Choose Existing”**

2
Select From **“OneDrive Files”**. Navigate to scanned file.

3
Locate the scanned file. Use **left or right arrows** to navigate to the correct location. Click **“Add”**.
