

# Screenshot Reader Extension: Chrome Browser

## Reads text out loud on a website or web-based program

**Introduction:** Screenshot reader extension adds reading support for Read&Write for Chrome. Provides a way to have inaccessible text on websites, O365 and Brightspace read out loud by providing OCR (Optical Character Recognition). Screenshot Reader will work on its own or within the Read&Write extension.

**Materials you will be using:** computer with Chrome Browser, [Screenshot Reader Extension](#) and [Read&Write Extension](#) added through the Chrome webstore.

\*SD71 has a District Subscription for Read&Write/ Screenshot Reader and has installed these extensions on all student and staff devices. Login with Microsoft account [student#@learn71.ca](mailto:student#@learn71.ca) and password. They are available for home devices through the district Microsoft login.
