

Windows Word Prediction

Enable text suggestions on devices so as students type, suggestions appear above their cursor to help them complete challenging words and continue working. Words are predicted based upon the letters typed; as they type more letters, new and more accurate suggestions will appear.

Enable text suggestions	
1	<p>Press “Window” key. Start typing “typ” in the search bar. Press the enter key.</p> 
2	<p>Under “Hardware keyboard”, turn the <i>Show text suggestions as I type</i> toggle On. This enables text suggestions when typing on the physical keyboard of your device.</p> 
4	<p>To support multilingual students (French Immersion), under the “Multilingual text prediction”, turn the <i>Show text predictions based on the recognized languages you’re typing in</i> toggle On.</p> 
5	<p>After updating the settings, suggested words will be provided as you type in Teams Chat, word processing programs, browsers and more.</p>
