

## Inclusive Education

### How to Use QR Codes with an iPad

- 1) **Open the Camera** Tap the **Camera** app on the Home Screen.  
(No special app needed—QR scanning is built in!)
- 2) **Point the Camera at the QR Code** Hold the iPad so the QR code appears in the **viewfinder**.  
You don't need to take a photo—just hover over it.
- 3) **Wait for the Link to Pop Up** A small **yellow box** or **banner** will appear at the top of the screen.  
This banner shows the website, video, or document linked to the QR code.
- 4) **Tap the Banner** Tap the banner to **open the link** in Safari or the appropriate app

---

#### Tips for Success

- Make sure the QR code is well lit and not blurry.
- Move the iPad closer or farther away if the code doesn't scan right away.
- If the banner doesn't appear, clean the camera lens or try adjusting the angle.
