

# Changing the Look of your Gallery

While you can't actually change the size of each image individually you can change the general look of the page and size of all the pictures, adjust the space between the pictures and change the background colour.

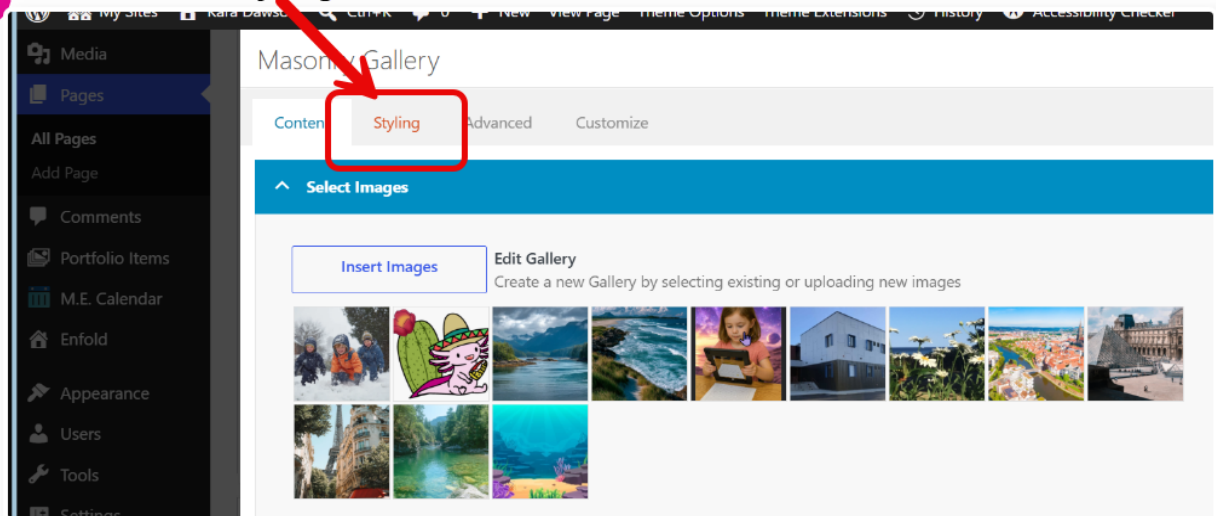

1 Go to your **Gallery** and click **Edit Page**

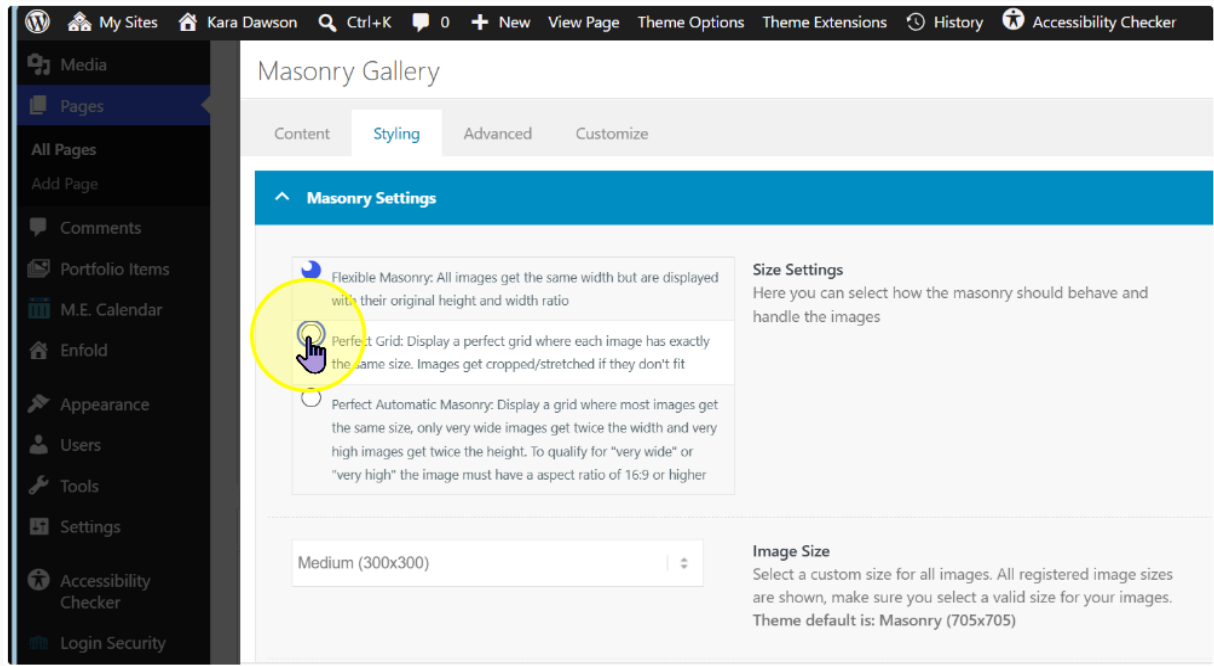

2 Click on the **Masonry Gallery** to open it.

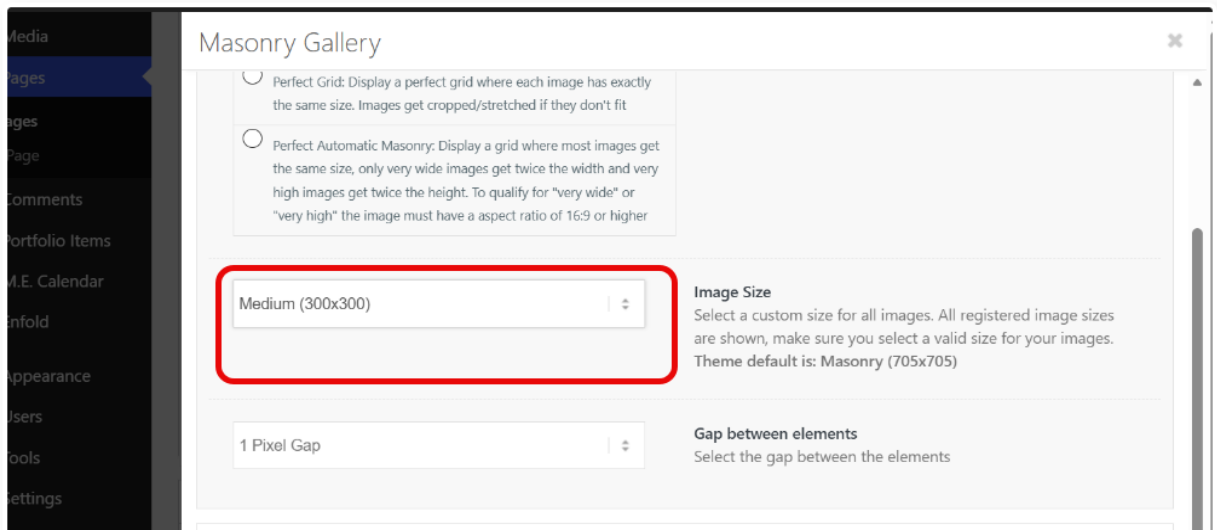

3 Click on the **Styling** tab

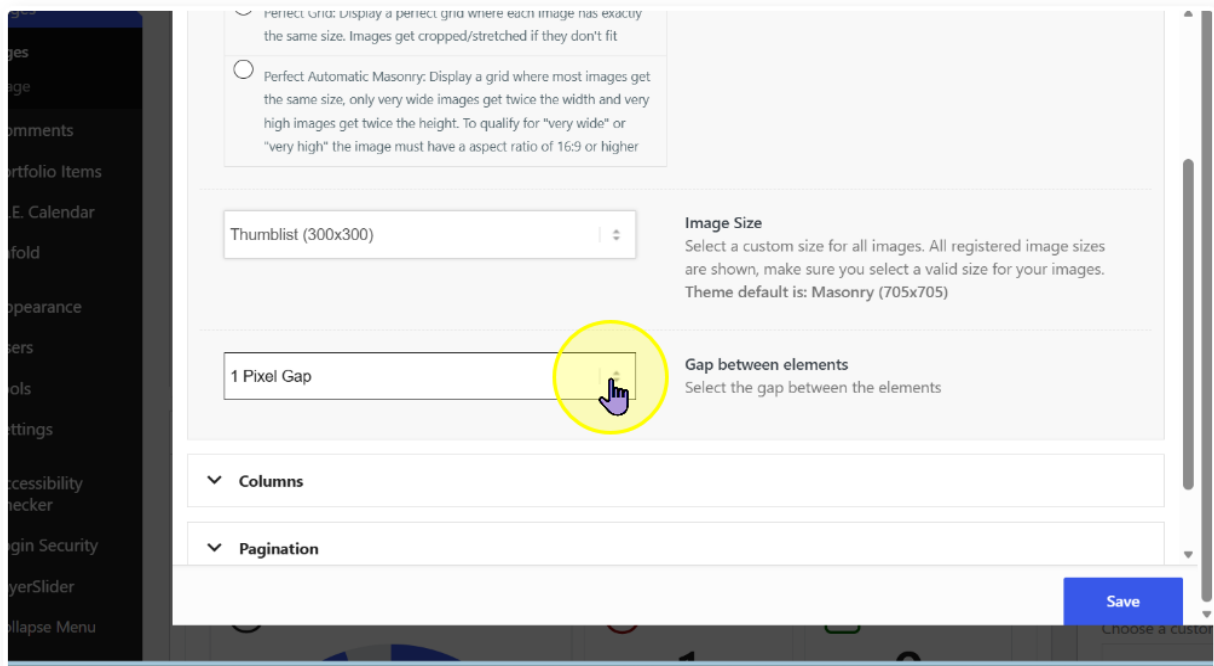

4 There are three choices for the general layout of the image. Click on the circle of your choice (you can always change everything back afterwards).

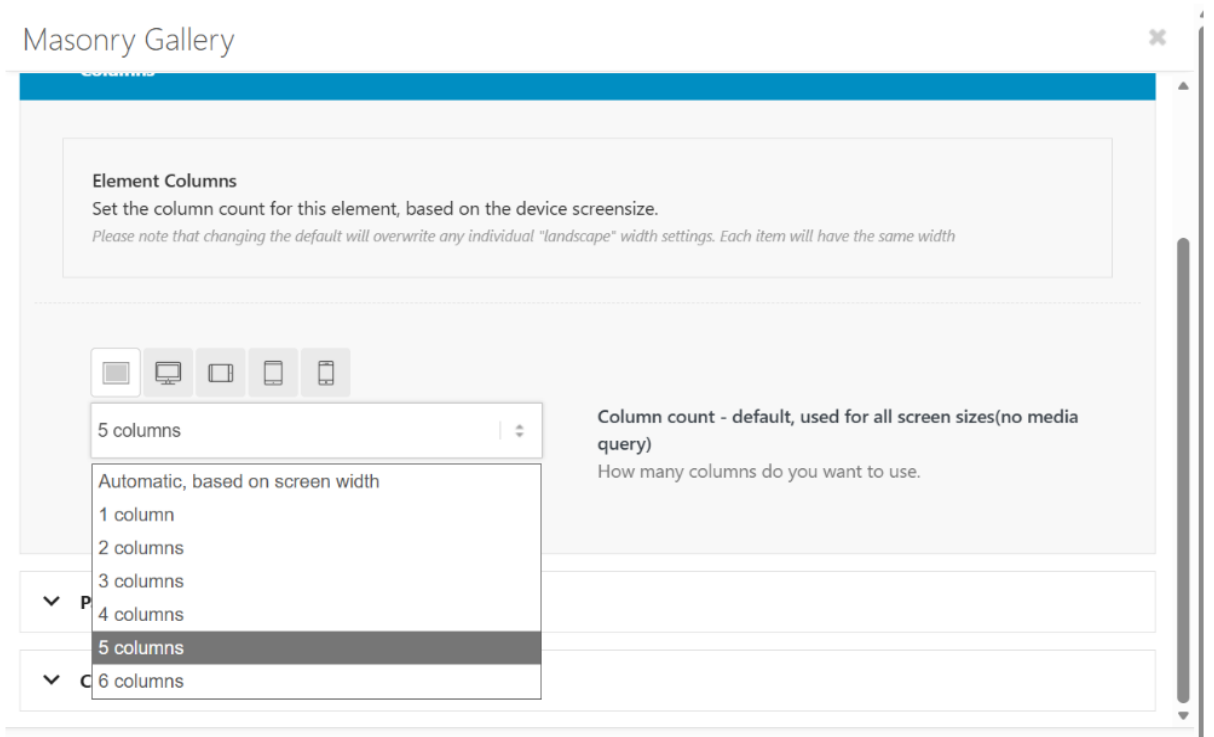

5 Click on the arrow on the box below the choices to get options for the size of your images.

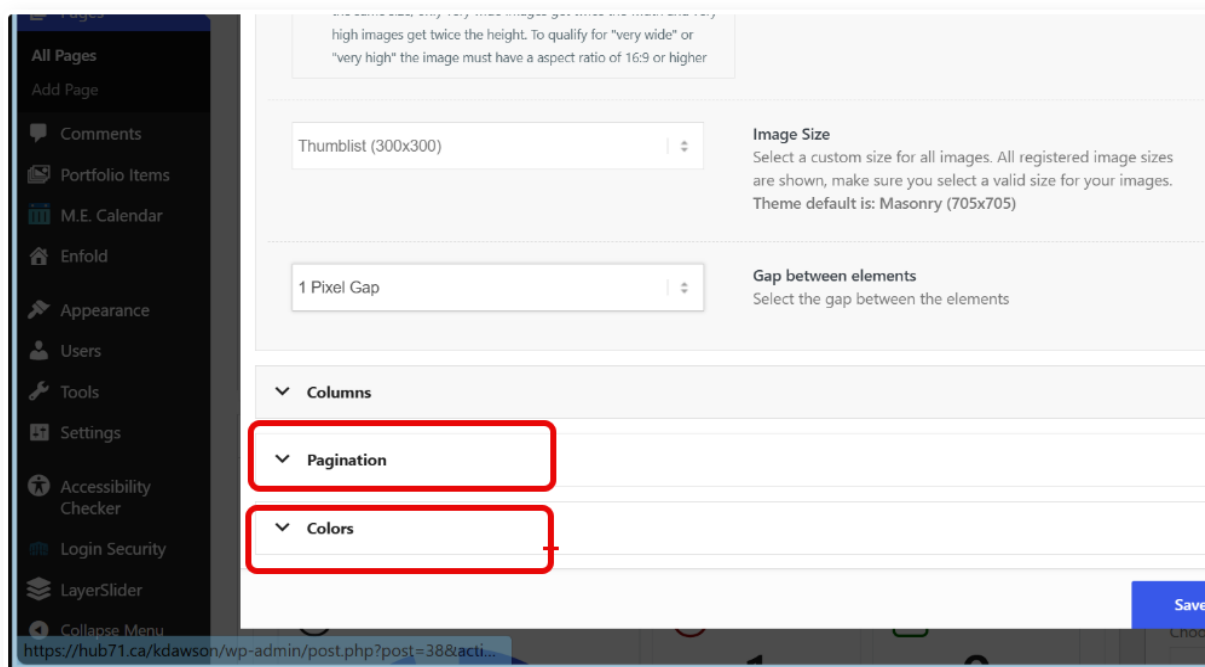

6 Click under that to change the gap between your images.

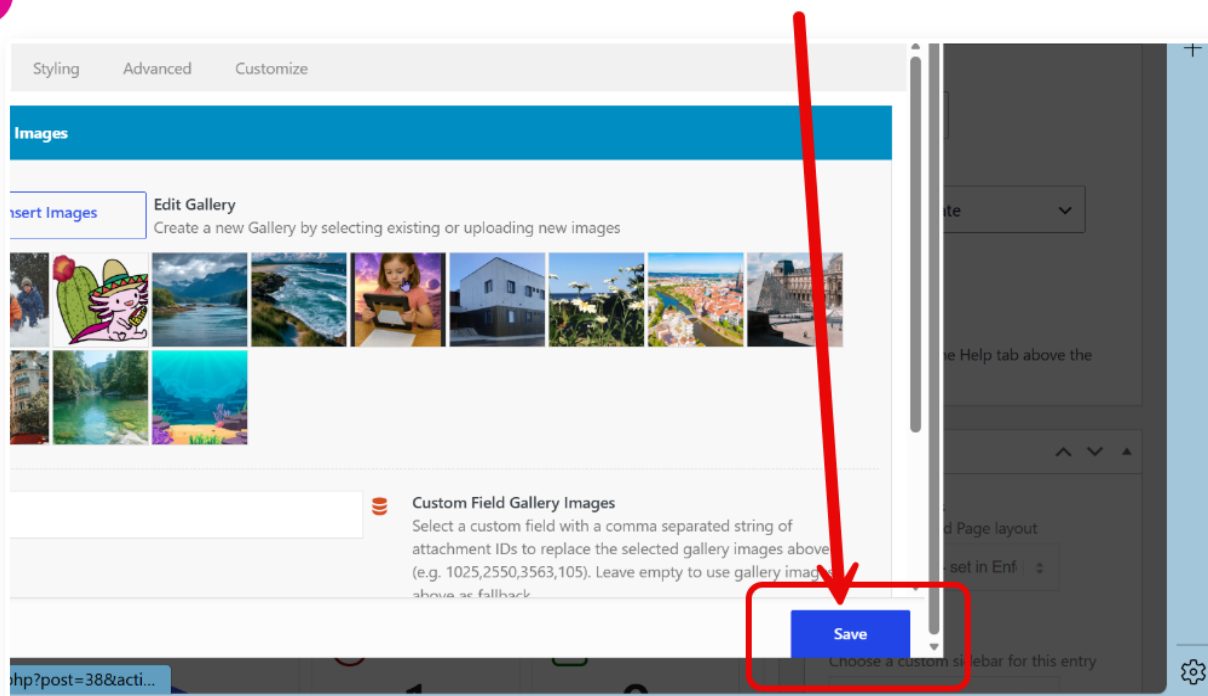

7 Click on Columns to choose how many columns of images you would like.

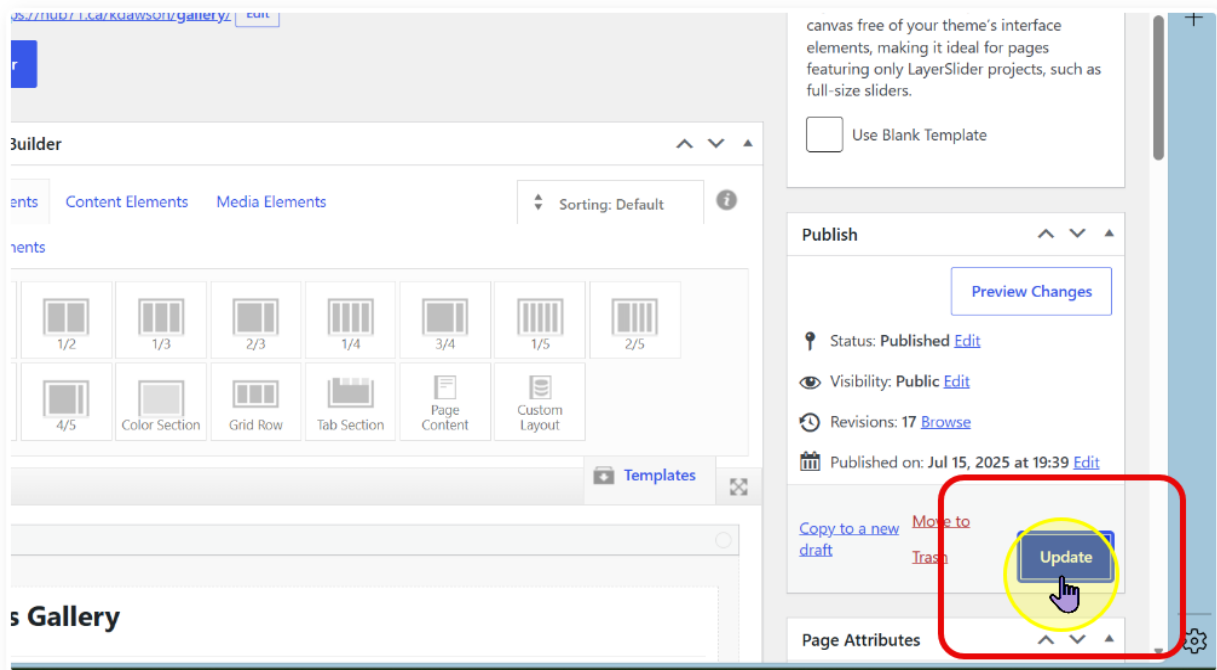

- 8 Click on **Pagination** to change the number of images that show on a page or **Colors** to change the background colour behind your images (click **Define Custom Colours** to change to your own).

- 9 When you are finished making changes, click on **Save**.

10 Click **Update** to save your changes.

11 Click **View** to see your changes.
