

How to Make a Page Password Protected

You can make any of your pages password protected and give users the password to open them.

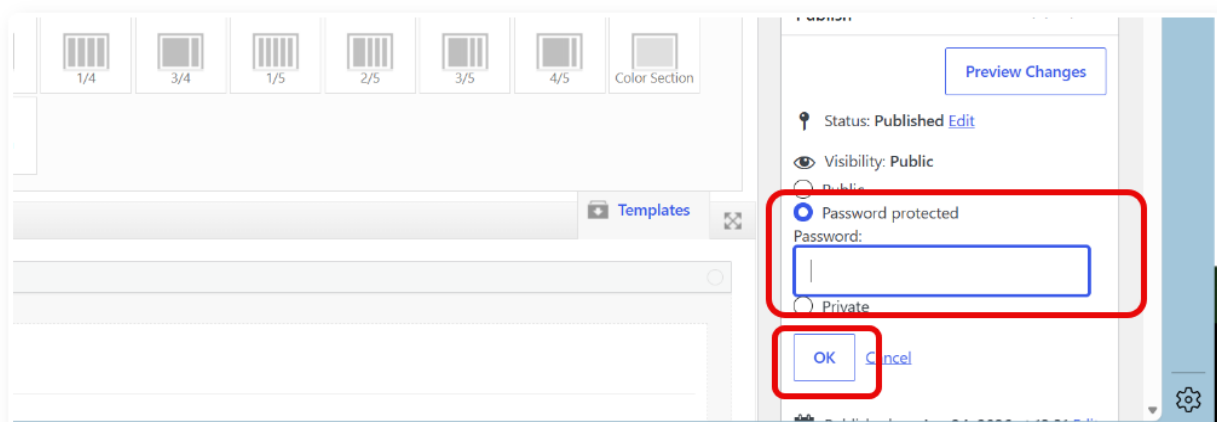

- 1 Navigate to the page you would like to password protect. Click on **Edit Page**.

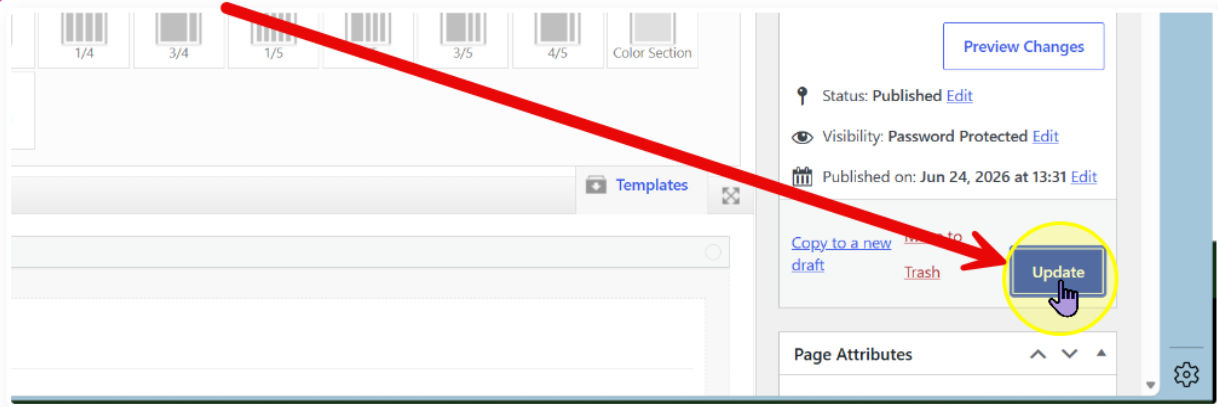

- 2 On the right side of the page under **Publish** find **Visibility: Public**. Then click on **Edit** beside it.

- 3 Click on the circle beside **Password protected** and then give the page a unique password. Click **OK**.

4 Click **Update**

5 Users who visit your site will now be asked for the Password.
