

► ClickView FAQs

How do I search?

Use the search bar at the top of ClickView to find videos by topic, subject, grade or keyword. Filter by curriculum, year level and resource type to quickly narrow results. [Learn more](#)

How do I know what's been newly added?

Check the [New & Noteworthy](#) section and ClickView blog to see the latest content, updates and featured collections.

How does Twig content differ from ClickView content?

Twig provides short, curriculum-focused, topic-driven clips on STEM concepts. ClickView complements this with a much broader library that includes longer-form documentaries, curated series and feature-length movies — supporting both single-lesson moments and deeper unit-level teaching. ClickView also provides videos across all K-12 learning levels and covers a wider range of subjects, including English Language Arts, Mathematics, Physical & Health Education, Visual & Performing Arts, Civics, and more!

Do Twig videos appear in the ClickView search?

Yes. Twig videos are fully integrated and appear alongside other ClickView content in search results.

How do I know if the videos are age-appropriate?

Every video is reviewed, curated and tagged by educators. Use year level, subject and curriculum filters to find videos suitable for your students.

Where do I find teacher resources for a video?

Open a video and select the **Resources** tab or scroll to the bottom to access lesson plans, worksheets and supporting materials (where available). [Learn more](#)

How do I search for an interactive video?

Use the Interactive filter in search to find videos with built-in questions and activities. [Learn more](#)

What accessibility tools are available?

ClickView supports captions, transcripts and Immersive Reader tools to help with reading, focus and comprehension. [Learn more](#)

How can I give feedback?

Use the Feedback option in ClickView to share ideas, request features or suggest improvements. [Learn more](#)
