Turning Windows Dictation On (Computer) – Windows 10/11

Turn on the built-in dictation tool in Windows to use the shortcut Windows Key + H to talk to type.		
1	Press Windows Key + H	
The first time you may be prompted to "turn on online speech recognition"		
2	Click on the link in the prompt	
3	Toggle the button to "On"	
4	Activate microphone again by placing cursor in an "active" text box and pressing "Windows Key + H"	
5	Wait until the computer is "listening" to you. "Blue" means listening. Tap the microphone to stop "Listening".	**Windows 10** Blue = Listening  White = Not Listening  **Windows 11** Blue = Listening  White = Not Listening
